

BEFORE THE OFFICE OF THE COMMISSIONER OF RAILROADS

STATE OF WISCONSIN

On the Commissioner's Own Motion for a Determination of the Adequacy of Warning Devices at the Grade Crossing of the Wisconsin Central Ltd. Tracks with CTH 'C' in the Town of Parkland, Douglas County

9164-RX-583

FINDINGS OF FACT AND ORDER

On November 18, 2004, the Commissioner of Railroads directed the staff of the Office of the Commissioner of Railroads (OCR) to investigate the adequacy of warning devices under §195.28, Stats., at the grade crossing of the Wisconsin Central Ltd. (WCL) tracks with CTH 'C' in the Town of Parkland, Douglas County (Crossing No. 186 121M / MP 451.20). At the crossing CTH 'C'; and CTH 'K' are routed together on the same roadway; for simplicity this order will refer to the crossing as CTH 'C'.

An OCR investigator inspected the crossings in May 2006. No hearing was held.

Findings of Fact

THE COMMISSIONER FINDS:

CTH 'C' is about 21' wide with 3'-wide gravel shoulders in the vicinity of the crossing and intersects the railroad tracks at an angle of about 33° (left-hand forward). The roadway approaches to the crossing are relatively flat. CTH 'C' carried an average daily traffic (ADT) of 1300 according to 2002 DOT records at a legal speed limit of 55 mph. CTH 'C' and CTH 'K' intersect about 75' north of the crossing.

The WCL operates 15 train movements per day over the crossing at a timetable speed of 30 mph (speed is restricted to 30 mph between MP 452.4 and 441.6). The crossing consists of one mainline track.

The exposure factor at this crossing is 19,500. The exposure factor equals the product of the number of trains per day and the number of highway vehicles per day, which yields a numerical value for the potential conflicts each day at the crossing.

Two train-vehicle accidents have occurred at this crossing since 1973. The accidents occurred in 1989 and 2000.

The Wisconsin Department of Transportation has produced a benefit-cost analysis for all at-grade crossings in the state. Installing new automatic flashing lights with gates and constant warning time circuitry at the CTH 'C' crossing has a net benefit of about \$787,000. The benefit-cost ratio is about 5.55 meaning that the public will receive \$5.55 in safety benefits for each dollar expended.

The crossing is presently protected with 12" incandescent automatic flashing lights and advance warning signs. The existing warning devices are inadequate. The existing warning devices will be adequate until such time as the new warning devices are installed. In order to adequately protect public safety 12" LED automatic flashing lights with gates and constant warning time circuitry are needed because of the exposure factor, skewed angle, and projected net benefit.

*Constant warning time circuitry* adjusts for train speed and causes the crossing signals to always operate for the same amount of time before the train reaches the crossing, regardless of train speed. A motion detector simply detects the train operation, but does not adjust for train speed so that the amount of warning time varies based on train speed.

*Light emitting diodes (LED)* lamps replace incandescent bulbs. LEDs have higher conspicuity, a wider cone of vision, and longer life than incandescent lights. LEDs are especially useful on east-west roadways where the rising and setting sun may make the signals difficult to see.

**Source of funding:** The signal materials and installation shall be paid from OCR safety funds.

#### Conclusion on the Issue

##### THE COMMISSIONER CONCLUDES:

That in order to adequately protect and promote public safety, it is necessary to install and maintain 12" LED automatic flashing lights with gates and constant warning time circuitry at the crossing of the tracks of Wisconsin Central Ltd. with CTH 'C' in the Town of Parkland, Douglas County.

#### Conclusion of Law

##### THE COMMISSIONER CONCLUDES:

That the jurisdiction of the Office of the Commissioner of Railroads under §195.28, Stats., extends to this matter. Accordingly, the Office enters an order consistent with the findings of fact.

#### Order

##### THE COMMISSIONER ORDERS:

1. That the **Wisconsin Central Ltd.** shall install and maintain 12" LED automatic flashing lights with gates, and constant warning time circuitry with appropriate appurtenances in accordance with such plans as are filed with and approved by the Office of the Commissioner of Railroads at the crossing of its tracks with **CTH 'C'** at-grade in the Town of Parkland, Douglas County by **December 31, 2006** (Crossing No. 186 121M / MP 451.20).

2. That the **Wisconsin Central Ltd.** shall submit to the Office of the

Commissioner of Railroads signal and circuit plans with the cost estimate of its proposed installation and upon completion of the signal project, a detailed statement of the actual cost to the Office and to the Wisconsin Department of Transportation.

3. That the signal installation work herein ordered shall not begin until the district office of the Wisconsin Department of Transportation informs the railroad that they may start such work and such start notice will not be issued until appropriate federal aid or other funding arrangements have been assured. The cost of the new project initiated before the start notice will not be reimbursed with public funds and shall be the responsibility of the railroad.

4. That to the extent feasible the **Wisconsin Central Ltd.** shall re-use the existing signal equipment.

5. That the **Wisconsin Central Ltd.** shall bear no part of the cost of the crossing signals installation, except for any cost assessed to the railroad pursuant to §195.60, Stats., for the investigation of this matter by the Office. The railroad shall not pass on those assessment costs either directly or indirectly.

6. That if the petitioner, railroad or any interested party objects to this order and requests a hearing within 20 days of the date of this order in writing, the Office will hold a public hearing.

7. That jurisdiction is retained.

Dated at Madison, Wisconsin, (May 24, 2006).

By the Office of the Commissioner of Railroads.
